INDEX—VOLUME I

Amino acids, analytical methods for determination, 269
———, percentage in representative foods, 284
Amylase, crytalline, 251
ANDERSON, C. W., 222
Anhydration process, 142
Antibody content of blood, effect of diet on, 265
Antioxidants, in fishery products, 378
———, rôle in flavor problems, 7
———, use of in powdered whole milk, 212
Antu, rodent control agent, 51
Apricots, canned, measurement of ripeness 527
Army, food research program, 389
Ascorbic acid, destruction during blanching of vegetables, 255
——— ———, retention during cooking of vegetables, 258
——— ———, retention in dehydrated vegetables during storage, 17
AYRES, JOHN C., 519

Bacteria, development of types resistant to germicides, 328
———, direct microscopic count in dairy samples, 222
———, growth curve in relation to food plant control measures, 229
———, relation to food handling and processing, 236
BAILEY, C. H., 290
BAILEY, CLYDE H., Nicholas Appert medalist, 287
BAKER, G. L., 11
BALL, C. O., 305, 503
B[ALL], C. O., 112, 113
BALLS, A. K., 245
BEATTIE, H. G., 174
BERRYMAN, GEORGE H., 126
BIRDSEYE, CLARENCE, 142
BLAKE, K. B., 17
Bread, packaged, treatment with high frequency heat, 174
BROOKS, R. F., 321
"Bruceets," 351
Brucellosis, food borne, 237
"Brucentrates," 351
BRYCE, W. A., 310
Butter, German, 412
———, quality of, influence of Vacreation, 203

California, sanitary control of food plants in, 354
CAMPBELL, W. L., 466, 497
Canned foods, German, 400
Canning technology, Japanese, 553
CARLIN, GEORGE T., 404
Carotene, destruction during blanching of vegetables, 255
———, retention in carrots during storage, 307
Carrots, carotene retention in, 307
———, freezing preservation, 307
CATHCART, W. H., 174
CLARDY, L., 178
CLARRIDGE, R. E., 427
CLAUSEN, S. W., 263
Cleaning practices, practical measures for the sanitary program, 66
Compound 1080, rodent control agent, 51
Concentrates, solid juice, 351
Cooking methods, effect on vitamin retention in vegetables, 258
Cost determination, in food operations, 466
COULTER, S. T., 208
Curriculum, food technology, 3
CRUESS, W. V., 3
CUNNINGHAM, RICHARD C., 470

DACK, G. M., 236
Dairy plants, planned efficiency in, 192
Dairy technology, use of detergents in, 478
——— ———, use of direct microscopic count in, 222
——— ———, use of Vacreator in, 199
DAUBERT, B. F., 7
Dehydrated foods *see* Foods, dehydrated
Dehydrated fruits, recent advances in production and handling, 147
——— ———, storage deterioration, 157
———, meats, German, 409
———, vegetables, contributions of Army during World War II, 133
Detergents, use in dairy plants, 478
DEWEY, BRADLEY, 107
DIEHL, H. C., 4
Diet, effect on growth and vitamin A storage in rat, 263
Diets, military problems concerning, 385
DONOVAN, JAMES, 95
DOVE, W. FRANKLIN, 39
DUNKER, C. F., 17
DUNN, CECIL G., 133, 371
DUNN, J. A., 415
DUNN, M. S., 269

EDITORIAL—Food is fundamental, 303
———, Food research is defense work, too, 113
———, The food technologist of the future, 107
———, Food technology curricula, 3
———, Freezing preservation of foods—the future, 3
———, Instruction in food technology in the universities and colleges of the United States, 299

———, Membership in Institute of Food Technologists, 110
———, New course in food technology, 305
———, Scientists will run the farms, 503
———, Technological tolerance, 304
———, Value of industrial research institutes to food technology, 497
Egg powder, dried, fluorescent spectra of extracts, 310
——— pulp, bacterial count reduction, 240
——— white, removal of sugar, 519
Electronic regulation of processes in food industries, 178
Electronics, use in blanching of vegetables, 252
Electrophotometric methods, use in measurement of ripeness of fruits, 527
ELLIS, N. R., 540
Enzymes, destruction during blanching, 255
———, relation to food quality, 245
Equipment, food processing, influence of design on heat transfer, 95
———, high frequency heating, 161
EVERS, CLIFFORD F., 421

FABIAN, F. W., 121
Fish, commercial preservation, 557
FISHER, D. F., 449
Fishery plants, chemical agents in sanitizing equipment of, 371
FITZGERALD, GERALD A., 575
Flat sour spoilage, in tomato juice, 78
Flavor, rôle of antioxidants in preservation, 3
Food acceptability, determination and evaluation of, 39
———, Drug and Cosmetic Act, 461
———, effect of nature of food eaten on desire for, 26
——— handling, bacteriological aspects, 237
——— industry, suggestions for line operation design, 115
———, objective measurements of quality, 345
——— plants, California system for sanitary control, 354
——— ———, waste disposal in, 214
——— poisoning, staphylococcal, 237
——— processing, bacteriological aspects, 237
——— ———, cost determination, 466
——— ———, German wartime methods, 394
——— ———, modern methods for freezing and preserving, 443
——— ———, modernization of, 427
——— ———, use of stainless steel in, 470
——— products, liquid sugar in, 506
——— quality, electrophotometric methods for determination, 527
——— ———, prevention of loss in fish, 371
——— ———, relation of enzymes to, 245
——— technology, curricula, 3
——— ———, instruction in, 299, 305
——— ———, U. S. Federal laws relating to, 461
Foods, dehydrated, ascorbic acid retention during storage, 17
——— ———, engineering aspects in production of, 142
——— ———, German, 398
——— ———, method for production of dry powdered orange juice, 85
——— ———, newer knowledge regarding powdered whole milk, 208
——— ———, relationship of moisture content to quality, 17
——— ———, sulfiting of, 138
———, factors influencing quality, 121
———, frozen, future of, 3
——— ———, German, 394
———, ———, modern methods for production, 442
———, ———, precooked, 421
———, ———, quality control, 575
———, ———, sanitation technic, 561
——— —, objective tests of quality in, 30
Frozen foods *see* Foods, frozen
Fruits, fresh, handling and storage, 565
———, ———, transportation of, 449

GEER, LAWRENCE, P., 351
Gels, "shelf life" of low-solids, 11
Germicides, activity of cationic, 321
———, development of bacteria resistant to, 328
———, use of in reduction of bacterial count of egg pulp, 240
Germicidal ice, use of in fisheries, 371
GOFF, B. L., 263

Hams, effect of curing on nutrient value, 540
HANKINS, O. G., 540
HARDING, H. G., 478
HARVEY, E. H., 303
Heat transfer, effect of design of food processing equipment, 95
HEDRICK, L. R., 240
High frequency heat, treatment of packaged bread, 174
———, ———, heating of equipment, 161
HIGHLANDS, MATTHEW E., 133
HINER, R. L., 540
HOAGLAND, RALPH, 540
HUCKER, G. J., 321
HUNTER, ALBERT C., 461
HUTCHINGS, BARBARA L., 421, 561

Ice, germicidal, 371
Institute of Food Technologists, membership in, 110
ISKER, ROHLAND A., 389

JACKSON, J. M., 78
Japanese canning technology, 553
JARVIS, NORMAN D., 556

JOHNSON, Robert E., 384
JONES, Elizabeth, 258
JUNK, W. R., 506

KATSAMPES, C. P., 263
KENYON, E. M., 85
KINGMAN, JR., H. E., 364
KINN, T. P., 161
KRAMER, Amihud, 527

LEE, Frank A., 307
LEPKOVSKY, Samuel, 26
Line operation design, problems in food technology, 115
LONGENECKER, Herbert E., 7
LOWE, Belle, 30
LUNDGREN, Harold P., 70

McCOORD, A. B., 263
McINTOSH, Jennie, 258
Meat packing, German, 404
——— products, sanitary practices in processing of, 364
——— substitutes, German, 410
MESCHTER, E. E., 11
METCALF, Dorothea, 321
MEYER, K. F., 354
Microbiological assay, for amino acids, 269
Milk, dry whole, flavor retention, 8
———, pasteurized, significance of direct microscopic count, 222
———, powdered whole, newer knowledge concerning, 208
Moisture content, relation to quality retention during storage, 17
MOYER, James C., 252
MRAK, E. M., 147

NELSON, O. M., 506
Nicholas Appert medal, presentation to Clyde H. Bailey, 287
NILSON, Hugo W., 556
Nordihydroguaiaretic acid, flavor stabilizer in food preservation, 8
Nutrition, Army problems in, 126, 385
NYDICK, A. J., 580

OBOLD, Walter L., 561
Oils, German industrial production, 404
OLSEN, R. W., 85
OLSON, F. C. W., 553
Orange juice, dry powdered, method for production, 85

PARKER, J. J., 174
PARKER, Milton E., 56
Patent law, of interest to food technologist, 580
Peaches, canned, measurement of ripeness, 527
PEARCE, Jesse A., 310
Pectic materials, methoxyl content, 15
Pemmican, value in military diets, 386
PENNISTON, Virginia A., 240
PENTZER, W. T., 565
Pest control, problem of sanitary engineer, 60
PETERS, Fredus N., 583
PHAFF, H. J., 147
Phenylthiocarbamide, as rodent control agent, 51
PILCHER, R. W., 394
Plant design, influence on efficiency in operation, 192
Poultry meat, objective tests for quality of, 30
Pre-sterilization, of canned tomato juice, 78
Processes, electronic regulation of, 178
PROCTOR, B. E., 304
Proteins, theory of molecular interaction in, 70
———, serum, effect of diet on, 267

RAMSEY, R. J., 192
Rats, effect of diet on growth and vitamin A storage, 263
Rodent baits, comparative toxicities to man, 54
———, control agents, wartime improvements in, 51

Salmonellosis, food borne, 237
Salt, use of in food industry, 415
SANBORN, N. H., 214
Sanitary control, California system for food plants, 354
———, engineering and the food technologist, 56
Sanitation, in frozen food industry, 561, 576
———, relation to equipment design, 364
SHERRILL, M. H., 506
SLUDER, J. C., 85
SMITH, Howard R., 345
SMITH, H. R., 527
SNIDER, G. G., 540
SOGNEFEST, P., 78
SPENCER, Donald A., 51
Stainless steel, use in food processing, 470
Standards, food, legal aspect, 583
Staphylococcal food poisoning, 237
STEWART, George F., 30, 299, 519
STOTZ, Elmer, 252
STUMBO, C. R., 229
Sugar, liquid, in food products, 506
———, removal from raw egg white, 519
Sulfiting of dehydrated foods, 138
Sulfuring, of fruits prior to dehydration, 153
Syrups, freezing and boiling points, 506

TAPLEY, William T., 307
Thiamine, retention during cooking of vegetables, 258
THOMPSON, John L., 115
Tomato flake, quality retention during storage, 17

———, juice, pre-sterilization before canning, 78
Transportation, problems in connection with fresh foods, 449
TREBLER, H. A., 478
TRESSLER, D. K., 17
Trichinosis, food-borne infection, 237
Tryptophan, effect in diet of rats, 263

URBAIN, W. M., 178

Vacreator, use of in dairy technology, 199
VAN ESELTINE, Wm., 321
Vegetables, blanching by electronics, 252
———, fresh, handling and storage, 565
———, ———, transportation of, 449
Vitamin A, storage by rat, 263
——— C *see* Ascorbic acid
———E, effect in diet of rats, 265
VUCASSOVICH, Michel P., 442

WARD, Justus C., 51
Waste disposal, in food plants, 214
Wheat, processing of kernel, 290
WILSON, Roger V., 287
WILSTER, G. H., 199
WOODMANSEE, C. W., 11
WRUCK, Marie, 17

Yeast, use in removal of sugar from raw egg white, 519
